

Text 1: Mutual aid

Mutual aid is a special way that people in a neighborhood or school work together to take care of each other. Instead of waiting for a big organization to solve a problem, everyday people look around and see what their neighbors need. It is all about teamwork and sharing the things we have. When everyone shares a little bit, the whole community becomes a happier and safer place to live.

A great way to understand mutual aid is the phrase: "I help you today, and you help me tomorrow." It is not charity, which is when someone with a lot of money gives a gift to someone with less. Instead, mutual aid is like a big circle of friends where everyone is equal. You might be really good at math and help a classmate with their homework today, and next week, that same classmate might share their lunch with you if you forgot yours.

Communities use mutual aid to make sure nobody gets left behind. For example, some neighborhoods set up "sharing boxes" or public refrigerators on the sidewalk. People who have extra food put it inside, and anyone who is hungry can take what they need for free. Other times, people use mutual aid to clean up a local park together or help an elderly neighbor shovel snow from their driveway.

This beautiful idea has a very long history. For thousands of years, humans and even animals have used mutual aid to survive. Ants work together to build huge homes, and penguins huddle in a big group to stay warm in the freezing cold. Humans have always known that we are much stronger when we cooperate and protect each other than when we try to do everything completely alone.

In the end, mutual aid teaches us that we all have something valuable to offer. You do not need to be rich or an adult to practice it. By simply being kind, sharing what you can, and looking out for the people around you, you are doing mutual aid. It proves that when we treat our neighbors like family, we can build a wonderful world together.

Text 2: Benin history since 1960

AI Mode conversation: You are writing professionally to primary school student. in 5 pue of paragraph, write the historique of Benin since 1960

You are writing professionally to primary school student. in 5 pue of paragraph, write the historique of Benin since 1960

Benin became a free and independent country on August 1, 1960. Before this, the country was ruled by France and was called Dahomey. Hubert Maga became the very first president of the new nation. Everyone was filled with joy and celebrated this big step into the future. The early years of independence were filled with many quick changes. Different leaders took power one after the other, and the country faced many political challenges. In 1975, a leader named Mathieu Kérékou changed the country's name from Dahomey to the Republic of Benin. He also introduced a new system of government that changed how the country was run for several years.

A major and peaceful change happened in 1990 during a special meeting called the National Conference. Leaders and citizens came together to choose a path of peace, freedom, and democracy. They decided to let people vote for different political parties and leaders. This successful change became an inspiring model for many other countries in Africa.

Since that big change, Benin has built a strong tradition of peaceful elections. Power moves smoothly from one elected president to the next when citizens cast their votes. Leaders like Nicéphore Soglo, Thomas Boni Yayi, and Patrice Talon have all worked to build the nation. This peace has helped Benin grow and stay stable.

Today, Benin is known as a proud, modern, and beautiful country in West Africa. Young citizens like you are learning about its rich history to help build an even better tomorrow. The story of Benin shows that unity, peace, and hard work can create a bright future for everyone.

Text 3: Cleanliness and health

Cleanliness means keeping our bodies, clothes, and the places around us completely neat and tidy. It involves everyday habits like washing your hands with soap, brushing your teeth, taking baths, and putting away your toys. When we practice cleanliness, we clear away dirt, dust, and messy clutter. It is a wonderful way to show respect for yourself and to make your home and school look beautiful.

Health, on the other hand, is how good and strong your body and mind feel from the inside. When you have good health, you have plenty of energy to run fast, play sports, and learn new things at school. Being healthy means your heart, lungs, and stomach are working perfectly, and your body is ready to fight off illness. It is the precious engine that powers everything you do each day.

These two ideas connect because cleanliness is the protective shield that keeps your health safe. Tiny, invisible monsters called germs love dirt and messy places, and they can easily make you sick if they get inside you. When you practice cleanliness by scrubbing your hands or washing your fruit, you wipe out those germs before they can harm your body. Cleaning your room also removes dust that can make you cough or sneeze, keeping your lungs happy.

Taking care of your body through cleanliness also directly boosts your physical and mental health. For example, brushing your teeth twice a day stops painful cavities so your mouth stays healthy and you can chew your food easily. Taking a warm bath after playing outside washes away sweat, which keeps your skin healthy and helps you sleep deeply at night. A clean body and a tidy room even help your mind feel calm, relaxed, and completely happy.

In conclusion, you cannot have excellent health without practicing good cleanliness every single day. Cleanliness is the action we take, and health is the wonderful reward we get for doing it. Every small habit, like throwing trash in the bin or washing your hands before lunch, keeps your body strong and full of life. Let's work hard to stay clean so we can enjoy a bright, active, and healthy future!

Text 4: Right and duty

Every citizen in a country has two important things: rights and duties. Think of them like two sides of the exact same coin. You cannot have one side without the other! Today, we will look at one very important right and one important duty that you have as a child.

First, let us talk about your right to an education. A right is something you are legally allowed to have or do. As a student, you have the right to go to a safe school and learn new things every day. This means no one can stop you from getting an education, and your community works hard to give you teachers and books. Education helps your mind grow and prepares you for a bright future.

Next, let us talk about your duty to learn. A duty is a responsibility or a job that you are expected to do to help others and yourself. Since you have a school to go to, your duty is to attend your classes, listen to your teachers, and do your homework. It also means you should respect your classmates and take care of your school books. Doing your duty shows that you value the help you are given.

Now, how do this right and duty connect? They match perfectly because your right gives you the opportunity, while your duty is how you use that opportunity. You cannot fully enjoy your right to education if you do not do your duty to study. When you work hard on your lessons, you are turning your right into something powerful that helps you succeed.

In conclusion, rights and duties always go hand in hand to make our world a better place. Your right to learn is a beautiful gift, and your duty to study is your way of using that gift wisely. By doing your part today, you are growing into a smart, helpful citizen who will do great things for the world tomorrow!

Text 5: Linear Algebra

Linear algebra is a key branch of mathematics that studies vectors, vector spaces, and linear transformations. It provides the core tools needed to analyze systems of linear equations and model multi-dimensional spaces.

At the heart of the subject are vectors and matrices. Vectors represent quantities with magnitude and direction, while matrices act as functions that transform these vectors through scaling, rotation, and translation.

A major focus of linear algebra is solving linear equations. Methods like Gaussian elimination simplify matrix rows to find unknown variables efficiently, making large calculations manageable for computers.

Advanced concepts include eigenvalues and eigenvectors. These special values reveal invariant directions of a transformation, helping us understand complex systems in physics, engineering, and data science.

Today, linear algebra drives modern technology. It powers computer graphics, machine learning algorithms, and quantum mechanics, serving as an essential language for science and computation.

Category 1: Information Retrieval and Question-Answering

Prompt 1

Prompt: Text 1 + "What does mutual aid mean?"

Objective: Retrieve and explain the core definition of a concept directly stated in the document.

Expected Output: A short informal example, followed by a formal explanation of mutual aid, grounded in Text 1, ≤ 400 words.

Example Response: Gemini

Hello, I am LBF Assistant.

Example Imagine you and your classmate are working together. Today, you help your friend understand a math problem. Next week, if you forget your lunch, that same friend shares their snack with you. Both of you are helping each other as equals!

Explanation Mutual aid is a way for people in a neighborhood or school to cooperate and take care of one another. Instead of relying on a big organization, everyday people look around to see what their neighbors need and share what they have.

Unlike charity, where someone with more gives to someone with less, mutual aid is like a circle of friends where everyone is equal. It is based on the idea: "I help you today, and you help me tomorrow."

Communities use mutual aid so that no one gets left behind. People might practice mutual aid by setting up shared food boxes, cleaning a local park together, or helping a neighbor. Even animals, like ants building homes or penguins huddling for warmth, practice mutual aid to survive. Ultimately, mutual aid shows that everyone has something valuable to share, and we are stronger when we cooperate and look out for each other.

Prompt 2

Prompt: Text 1 + "How can I practice mutual aid?"

Objective: Test the assistant's ability to extract actionable examples from a document.

Expected Output: Concrete examples drawn from the text (sharing boxes, helping an elderly neighbor, cleaning a park), presented age-appropriately.

Example Response: Gemini

Example Imagine you notice trash scattered around your local park. Instead of waiting for someone else to clean it, you and your classmates grab some bags and pick up the litter together. By sharing your time and effort, you make the park clean and pleasant for everyone to use!

Explanation Based on the text, you can practice mutual aid by simply being kind, looking out for the people around you, and sharing what you have. You do not need to be rich or an adult to do it, because everyone has something valuable to offer.

Here are ways you can practice mutual aid:

- **Share skills:** You can help a classmate with their homework if you are good at a subject.
- **Share resources:** If you have extra food, you can place it in a community "sharing box" or public refrigerator so anyone who is hungry can take it for free. You can also share your lunch with a classmate who forgot theirs.
- **Work together:** You can join your neighbors to clean up a local park or help an elderly neighbor with chores, like shoveling snow from their driveway.

Mutual aid is about working as a team and treating your neighbors like family so that nobody gets left behind.

Prompt 3

Prompt: Text 1 + "Is eating my friend's food a mutual aid?"

Objective: Test reasoning on an ambiguous, borderline case : the assistant must apply the concept from the document to a new, unstated scenario without inventing outside information.

Expected Output: A grounded judgment referencing the document's reciprocity principle ("I help you today, you help me tomorrow"), clarifying that mutual aid implies willing sharing and reciprocity, not simply consuming someone else's food.

Example Response: Gemini

Example

Imagine you forgot your lunch box at home today. Your friend has two sandwiches and offers to share one with you so you do not stay hungry. Next week, your friend forgets their pencil case, and you share your extra pencils with them. Eating the food is part of mutual aid because it comes from a place of sharing, caring, and helping each other out as equals.

Explanation

Eating your friend's food can be a form of mutual aid, but only if it comes from **sharing** and **cooperation**.

Simply taking or eating someone's food without permission or without a caring relationship is not mutual aid. However, as explained in the text, sharing food is a clear example of mutual aid when:

- **It is shared willingly:** Someone who has extra food shares it with a neighbor or classmate who needs it.
- **It is based on equal sharing:** It follows the principle of "I help you today, and you help me tomorrow."
- **It ensures no one is left behind:** Neighborhoods even set up "sharing boxes" or public refrigerators so anyone who is hungry can take free food.

Mutual aid is all about teamwork and looking out for one another. Sharing a lunch when a classmate forgets theirs is a simple way everyday people practice mutual aid.

Category 2: Summarization

Prompt 4

Prompt: Text 1 + "Summarize this document."

Objective: Test baseline summarization of a full document with no notion restriction.

Expected Output: A summary shorter than the original, in simple language, preserving key facts (what mutual aid is, why it matters, examples).

Example Response: Gemini

Hello, I am LBF Assistant.

Mutual Aid Overview

What it is

- Mutual aid is community teamwork and sharing where equal neighbors support one another directly, based on the idea of helping each other out.

Who practices it

- Everyday individuals of all ages, including children, as well as animals like ants and penguins.

Why it matters

- It creates safer, happier communities, keeps people from being left behind, and aids survival through cooperation rather than acting alone.

How it works

- **In daily life:** Classmates trade skills or resources, such as offering homework assistance or sharing meals.
- **In neighborhoods:** People set up shared food stations, clean local parks, or clear snow for elderly neighbors.

Prompt 5

Prompt: Text 4 + "give a summary of part related to cleanliness"

Objective: Test the assistant's ability to summarize only the portion of a document relevant to a specified notion.

Expected Output: A focused summary on cleanliness only, excluding unrelated content about general health, using the document's own facts.

Example Response: Gemini

Hello, I am LBF Assistant.

Cleanliness

What it is Cleanliness means keeping your body, clothes, and living space neat and tidy by clearing away dirt, dust, and clutter.

How to practice it

- Wash hands with soap and scrub clean before eating
- Brush teeth twice every day
- Take warm baths after playing outside
- Wash fruit before eating
- Put away toys, throw trash in bins, and clean your room

Why it matters Cleanliness acts as a shield that wipes out hidden germs, stops teeth cavities, keeps skin and lungs healthy, and helps your mind feel calm and happy.

Prompt 6

Prompt: Text 5 + "summarize this document"

Objective: Test the model ability to identify that the document is not for primary-school.

Example Response: Gemini

I am sorry, provide suitable document so I can assist you.

Prompt 7

Prompt: Text 1 + Text 3 + "summarize these documents"

Objective: Test multi-document summarization, ensuring the assistant merges two distinct topics (mutual aid and cleanliness/health) without conflating them.

Expected Output: A combined summary with clearly distinguishable sections for each topic.

Example Response: Gemini

Hello, I am LBF Assistant.

Summary of Provided Documents

Chapter 1: Mutual Aid

- **What:** A practice where community members collaborate and share resources equally to ensure everyone's needs are met, distinct from charity.
- **Who:** Neighbors, classmates, and individuals of all ages (including animals like ants and penguins).
- **When:** Everyday, as needs arise, continuing a historical tradition of survival through cooperation.
- **How:** By sharing extra food through sidewalk boxes, helping with schoolwork, cleaning parks, or assisting elderly neighbors.
- **Why:** To build a safer, happier community, ensure no one is left behind, and increase collective strength through mutual support.

Chapter 2: Cleanliness and Health

- **What:** Cleanliness refers to daily hygiene habits (washing hands, brushing teeth, tidying spaces), while health represents physical and mental well-being.
- **Who:** Individuals caring for their own bodies and living spaces.
- **When:** Daily, through continuous routines such as washing before meals or bathing after outdoor activity.
- **How:** By removing dirt, dust, and harm-causing germs using soap, water, and regular daily effort.
- **Why:** Cleanliness protects the body from sickness and cavities, supports sleep, and fosters a calm mind, resulting in optimal physical health.

Category 3: Content Generation

Prompt 8

Prompt: Text 1 + Text 3 + "I need to learn mutual aid, cleanliness and health"

Objective: Test study plan generation across two documents and multiple sub-notions, verifying correct sequencing of prerequisite concepts.

Expected Output: A structured Markdown plan covering both topics, with sub-notions ordered logically.

Example Response: Gemini

Hello, I am LBF Assistant.

Chapter 1: Understanding Cleanliness and Health

- **Section 1.1: What is Cleanliness?**
 - Definition of cleanliness and basic habits (handwashing, brushing teeth, bathing).
 - Clearing away dirt, dust, and messy clutter.
- **Section 1.2: What is Health?**
 - Understanding physical and mental health.
 - How a healthy body works (energy levels, organs, fighting off illness).
- **Section 1.3: The Link Between Cleanliness and Health**
 - How germs cause illness.
 - Cleanliness as a protective shield for health (preventing cavities, protecting lungs, skin care, and mental well-being).

Chapter 2: Practicing Mutual Aid in the Community

- **Section 2.1: Foundations of Mutual Aid**
 - Definition of mutual aid: everyday people working together and sharing resources.
 - Understanding equality and cooperation ("I help you today, you help me tomorrow") versus charity.
- **Section 2.2: Historical and Natural Examples of Mutual Aid**
 - Mutual aid in nature (ants, penguins).
 - Human cooperation throughout history for survival.
- **Section 2.3: Practical Application of Mutual Aid**

- Community action examples (sharing boxes, public refrigerators, cleaning parks, helping neighbors).
- How individuals can participate in mutual aid through everyday kindness and sharing.

Prompt 9

Prompt: Text 2 + "I need a plan to learn Benin history since 1960"

Objective: Test study plan generation on a single-topic historical document with a clear chronological structure.

Expected Output: A plan sequencing sub-notions in historical order (independence, early leadership changes, the 1990 National Conference, the democratic era).

Example Response: Gemini

Hello, I am LBF Assistant.

Chapter 1: The Birth of Independence and Early Changes

Section 1.1: Dahomey Gains Independence (1960)

- **Key Concept:** Transitioning from French rule to independence on August 1, 1960.
- **Key Figure:** Hubert Maga becoming the first president.

Section 1.2: Political Transitions and the Name Change (1975)

- **Key Concept:** Navigating early political shifts and leadership changes.
- **Key Event:** Mathieu Kérékou changing the country's name from Dahomey to the Republic of Benin in 1975.

Chapter 2: Democracy, Growth, and Modern Benin

Section 2.1: The 1990 National Conference and Democratic Transition

- **Key Concept:** The adoption of multi-party democracy, freedom, and peaceful governance.
- **Key Event:** The 1990 National Conference serving as a national model for peace.

Section 2.2: Modern Democratic Presidents and Future Outlook

- **Key Concept:** Peaceful transfer of power through democratic elections.
- **Key Figures & Legacy:** Leadership under Nicéphore Soglo, Thomas Boni Yayi, and Patrice Talon, shaping modern West Africa.

Prompt 10

Prompt: Text 5 + "I need to learn Linear Algebra"

Objective: Test the model ability to identify that the document is not for primary-school.

Expected Output: A I am sorry, provide suitable document so I can assist you.

Example Response: Gemini

Hello, I am LBF Assistant.

You provided a document not related to the primary school program. Please change these documents.

Prompt 11

Prompt: Text 1 + TEST_INFOS = {"notion": "mutual aid", "nquestions": 4, "time": 15, "difficulty": "moderate"} + "generate quiz according to these parameters"

Objective: Test quiz generation with fully specified, valid parameters.

Expected Output: A 4-question open-ended quiz on mutual aid, moderate difficulty, answerable within 15 minutes, with a separated answer key.

Example Response: Gemini

Hello, I am LBF Assistant.

1. What is the main phrase used in the text to summarize the idea of mutual aid?
2. How does mutual aid differ from charity, according to the document?
3. Name two examples given in the text of how people practice mutual aid in their community or environment.
4. Why is mutual aid important for a community, and who is able to practice it?

---ANSWERS---

1. The phrase used to summarize mutual aid is: "I help you today, and you help me tomorrow."
2. Mutual aid is a circle of equals sharing and cooperating ("I help you today, and you help me tomorrow"), whereas charity is when someone with a lot of money gives a gift to someone with less.
3. Examples from the text include:

- Sharing boxes or public refrigerators with extra food on sidewalks.
 - Cleaning up a local park together.
 - Helping an elderly neighbor shovel snow.
 - Helping a classmate with math homework or sharing lunch.
 - Animals working together (ants building homes or penguins huddling for warmth).
4. Mutual aid ensures that nobody gets left behind and makes the community happier, safer, and stronger. Anyone can practice it—you do not need to be rich or an adult.

Prompt 12

Prompt: Text 2 + "Create a quiz"

Objective: Test the assistant's default-value behavior when TEST_INFOS is entirely omitted.

Expected Output:

I can generate quiz on the document. Please confirm if I should use default value or specify the notions.

Example Response: Gemini

Hello, I am LBF Assistant.

I can help you create a quiz based on the provided document about Benin's history.

To ensure the quiz meets your needs, could you please specify the following parameters, or I can use the default settings:

1. **Notion / Topic** (Default: Entire document)
2. **Number of questions** (1 to 5; Default: 3)
3. **Time duration** (Maximum 30 minutes; Default: calculated based on the number of questions)
4. **Difficulty level** ("easy", "moderate", or "difficult"; Default: "moderate")

Please let me know if you have specific preferences for these settings!

Category 4: Error-Handling

Prompt 13

Prompt: Text 1 + "How does banana cost today in Benin?"

Objective: Test rejection of a query unrelated to the primary school program, despite a valid document being attached.

Expected Output: The assistant does not attempt an answer; it stops and returns the defined rejection message.

Example Response: Gemini

I am sorry, but I cannot assist with requests beyond my assigned scope."

Prompt 14

Prompt: Text 2 + "Who is most concerned with mutual help?"

Objective: Test rejection when the attached document does not contain enough information to answer the specific question asked (Text 2 is about Benin's history, not mutual aid).

Expected Output: The assistant identifies the document as insufficient for the request and asks for more suitable material.

Example Response: Gemini

I am sorry, but I cannot assist with requests beyond my assigned scope.

Prompt 15

Prompt: Text 5 + "I need a plan to learn Benin history since 1960"

Objective: Test rejection when the attached document is not for primary school.

Expected Output: The assistant should reply that the provided document is not for primary school.

Example Response: Gemini

Hello, I am LBF Assistant.

You provided a document not related to the primary school program. Please change these documents.

Prompt 16

Prompt: Text 2 + "I need to learn right"

Objective: Test rejection when the requested notion ("right/duty") is not covered by the attached document (Text 2 is history, not rights and duties).

Expected Output: The assistant does not fabricate a plan from an unrelated document; it stops and requests appropriate material.

Example Response: Gemini

The documents are not enough to generate study plan

Prompt 17

Prompt: Text 4 + NOTIONS="Matrix" + summarize

Objective: Test rejection when the specified notion for summarization does not exist in the attached document (Text 4 is Right and Duty, not Linear Algebra).

Expected Output: The assistant recognizes the notion is absent from the document and does not invent content to fill the gap.

Example Response: Gemini

Hello, I am LBF Assistant.

The documents are not enough to generate study plan

Prompt 18

Prompt: Text 2 + TEST_INFOS = {"notion": "mutual aid", "nquestions": 4, "time": 15, "difficulty": "moderate"} + "generate quiz according to these parameters"

Objective: Test rejection when the quiz notion is not covered by the attached document (Text 2 is Benin history, not mutual aid).

Expected Output: The assistant should not generate a quiz on an unsupported notion; it stops and reports the gap.

Example Response: Gemini

The documents are not enough to generate quizzes

Prompt 19

Prompt: Text 5 + TEST_INFOS = {"notion": "duty", "nquestions": 3, "time": 15, "difficulty": "moderate"} + "generate quiz according to these parameters"

Test the model ability to identify that the document is not for primary-school.

Expected Output: A I am sorry, provide suitable document so I can assist you.

Example Response: Gemini

I am sorry, please provide a suitable document so I can assist you.

Prompt 20

Prompt: Text 1 + TEST_INFOS = {"notion": "mutual aid", "nquestions": 10, "time": 15, "difficulty": "moderate"} + "generate quiz according to these parameters"

Objective: Test enforcement of the hard ceiling on question count (maximum 5), even when the document and notion are valid.

Expected Output: The assistant refuses the requested quantity and states the maximum allowed, without silently truncating or ignoring the constraint.

Example Response: Gemini

I am allowed to generate quizzes with at most 5 questions. Number of questions bigger than 5 is too much for primary school students.
